**MATERIAL SAFETY DATA SHEET**

Lambert Southwest (903)657-4680  Product: Antique Rose  
Division of G. W. Holladay Interests Inc.  
P O Box 1111, Henderson TX  75653  Date: January 2012  
Haz Mat  Emergency Infotrac 1-800-535-5053

**HAZARD MATERIAL IDENTIFICATION SYSTEM**

- Health Hazard: 1 - Slight  
- Flammability Hazard: 0 - Minimal  
- Reactivity Hazard: 0 - Minimal  
- Personal Protection: E - Glasses, Gloves, Dust Resp

**SECTION I. MATERIAL IDENTIFICATION**

- Trade/Material Name: NATURAL IRON OXIDE - ROUGE  
- Description: Metallic Brown Iron Oxide  
- Other Designations: 219-0080 Antique Rose  
- CAS: 1332-37-2  
- Chemical Name: Fe$_2$O$_3$

**SECTION II. INGREDIENTS AND HAZARDS**

INGREDIENT NAME: Aluminum Oxide  
CAS NO. 1344-23-1  
PERCENT <5  
EXPOSURE LIMITS ACGIH TLV: 10 mg/M³ TWA (compound as Al)

SARA TITLE III: Section 313 Supplier Notification

This product does not contain toxic chemicals subject to the reporting requirements of section 313 of the Emergency Planning and Community Right-To-Know Act of 1986 and of 40 CFR 372.

**SECTION III. PHYSICAL/CHEMICAL CHARACTERISTICS**

Appearance and Odor: Reddish Brown Powder, No Odor
Solubility in Water (%): Insoluble

**SECTION IV. FIRE AND EXPLOSION DATA**

Specific Gravity (H₂O=1) 4.9-5.1
Flash Point (method): Non-flammable
Extinguishing Media: As appropriate for surrounding combustibles. Does not burn or support combustion. No fire or explosion hazard.
Unusual Fire or Explosion Hazards: None
Special Fire fighting Procedures: Fire fighter should wear self-contained breathing apparatus.

**SECTION V. REACTIVITY DATA**

Material is stable - Hazardous polymerization will not occur

Chemical incompatibilities: None known.
Hazardous Decomposition Products: None will occur.
SECTION VI. HEALTH HAZARD DATA

Summary of Health Risks and Symptoms of Exposure: Skin contact may cause mechanical irritation due to the abrasion. Eye contact will result in no specific effects other than general particulate irritation in the eye. Not absorbed by the body. Excessive exposure above the TLV can give mild pulmonary irritation.

Target Organs: Lungs

Principal Routes of Entry: Inhalation, ingestion, skin and eye contact.

Acute Effects: Inhalation of the dust may cause mechanical irritation to the respiratory fibrosis. Continued exposure to silica can lead to cardiopulmonary impairment.

Emergency and First Aid Procedures:

Eye Contact: Flush thoroughly with plenty of water for at least 15 minutes. Get medical help if irritation persists.

Skin Contact: Wash skin with mild soap and water.

Inhalation: Remove to fresh air. Get medical help for any breathing difficulty.

Ingestion: If conscious, give large quantities of water to induce vomiting. Get medical attention.

Crystalline silica which may be present in quantities greater than 0.1% has been reviewed by IARC. They found limited evidence for carcinogenicity of crystalline silica in humans and sufficient evidence in experimental animal.

SECTION VII. PRECAUTIONS FOR HANDLING, USE OR DISPOSAL

Spill/Leak procedures: Those involved in clean-up of spills should use respiratory protection for airborne dust. Vacuum or scoop up spilled material for recovery or disposal, avoiding dusting conditions and using good ventilation. Wetting the spill with a water spray may help to keep airborne dust levels down.

Waste Management/Disposal: Refer to any local, State or Federal regulations for specific disposal information. Pursuant to 40 CFR part 261 of the Resource Conservation & Recovery Act (RCRA) regulations currently in effect, discarded Iron Oxide would not be classified as a hazardous waste.
SECTION VIII. SPECIAL PROTECTION INFORMATION

Personal Protective Equipment:

- **Goggles:** Safety glasses with side shields or dust tight goggles.
- **Gloves:** Leather or rubber gloves.
- **Respirator:** If exposure limits are exceeded, an appropriate NIOSH approved dust respirator should be used.

Workplace Considerations:

- **Ventilation:** Provide adequate exhaust ventilation to meet TLV requirements in the workplace. An exhaust filter system may be required to avoid environmental contamination.
- **Safety Stations:** An eye wash station should be available to the area of use.
- **Other:** Good industrial hygiene practice requires that employee exposure be maintained below the recommended TLV. This is preferably achieved through the provision of adequate ventilation where necessary. Where dust cannot be controlled in this way, personal respiratory protection should be employed.

SECTION IX. SPECIAL PRECAUTIONS

DOT Class: Not regulated
